Spotlight on Survivin Regulation via Post Translational Modification

Survivin regulation by p53, Cdc2, PLK1 and Aurora B is critical to the inhibition of apoptosis and cell survival. For instance, phosphorylation at site 20 inhibits survivin, whereas phospho site 34 activates survivin and inhibits apoptosis. Alternatively, acetylation at site 129 negatively affects STAT3 tumor transactivation.

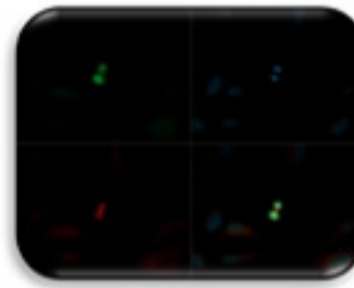

Novus is committed to advancing the understanding of survivin regulation with our innovative line of top quality [apoptosis](#) research reagents. Here we are highlighting some of our most popular Survivin antibodies specific for various post translational modification states.

**Survivin Antibody
(NB500-238)***

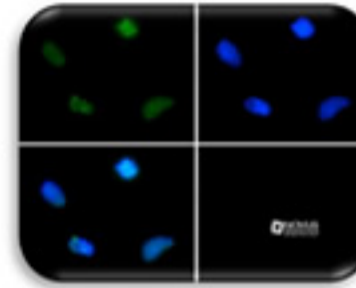

IHC analysis of Survivin in ovarian cancer tissue.

**Survivin [p Ser20] Antibody
(NB110-92717)***

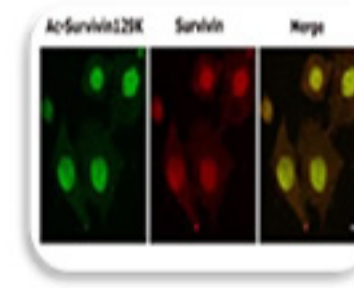

IF analysis of p-S20 Survivin in HeLa cells. Survivin Peptide (NB110-92717PEP)

**Survivin [p Thr34] Antibody
(NB500-236)***

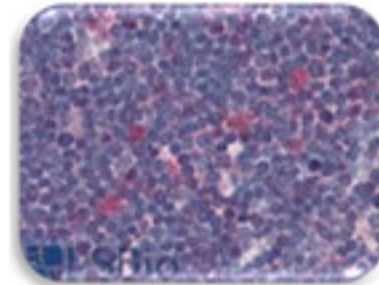

IF analysis of p-T34 Survivin in HeLa cells.

**Survivin [ac Lys129] Antibody
(NBP1-47639)***

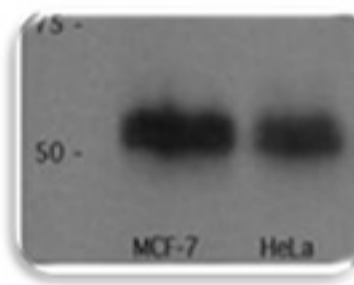

IF analysis of ac-K129 Survivin in HeLa cells. Survivin Peptide (NBP1-47639PEP)

**Cdc2 Antibody
(NB500-357)**

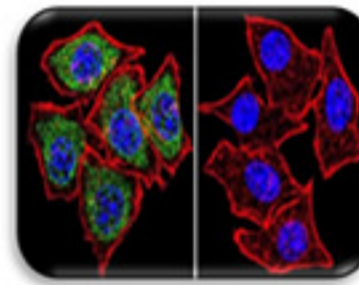

IHC analysis of CDK1 in human thymus tissue.

**p53 Antibody
(NB200-103)***

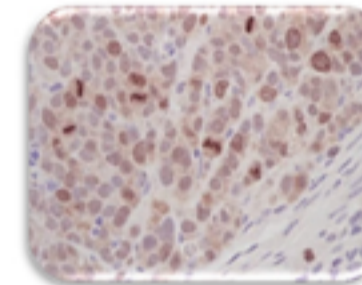

WB analysis of p53 in MCF7 and HeLa lysates

**PLK1 Antibody
(NB100-74502)**

IF analysis of PLK1 in HeLa cells.

**Aurora B Antibody
(NB100-294)**

IHC analysis of AurB in SW620 human tumor xenografts.

*Trial Size available

Save 20% on all conjugated primary antibodies until 9/30/13. Labels include HRP, Biotin, FITC, DyLight Dyes & More. [Learn More](#)

Test a product in a new species or application and receive a voucher for 100% of the purchase price. [Learn more](#)

Submit a product review and win a \$500 travel grant. Good for conference and air travel. [Learn more](#)

Novus Biologicals is able to offer [special bulk pricing](#) as well as custom conjugation. To make an enquiry please [email us](#).

Please contact us with any questions. We look forward to providing you with quality research tools.
